

My Will

This is the last will of myself, Bryden Thomas Allen of unit 7, 5 Knox Street, Ashfield, NSW.

1 I revoke all former testamentary dispositions.

2 I appoint my son Timothy Mark Allen and my daughter Rebecca Ruth Allen my executors and trustees and I refer to them in my will as “my trustees”.

3 My estate at the moment consists of approximately:-

a. St George Bank accounts:- my current account 010 910 649 (about \$55,000);

savings account1 0347 595 859 (about \$32,000);

savings account2 0348 041 659 (\$29,000),

b. my unit 7, 5 Knox St, Ashfield - worth about \$800,000,

c. land in New Zealand - worth about \$400,000,

d. the unit 13, 92 Cambridge St, Stanmore - worth about \$500,000.

So my total estate is worth slightly more than \$1,800,000.

4 I want \$100,000 to be used to maintain my website on the internet for the next 100 years. This is because all my work of the past 40 years deals with the future. And, if this work is to be appreciated, then it needs to be seen by some people of our future world. I know this is difficult. But I want these accounts to help in this process.

The cost of keeping my website on the Internet at present is \$161 per year. So these accounts should be sufficient to cover this expense easily. I think my son Tim Allen and his descendants are the appropriate people to do this work. And any help work, which will help this task, should be paid for out of this account. But mostly this should not involve too much work. If some people want to update it or to extend the site, then Chris Perry (who helped me create it) can help them because he knows the full details. And he should be paid for such work out of this account. Of course, only the people, who appreciate the website, should do any of this work.

5 I give the residue of my estate to my children, my grand-children and my possible great-grand children. But my children are to receive twice

as much of my estate as my grand-children. And my grand-children are to receive twice as much as my great-grand children.

At present I have five children (Timothy Allen, Naomi Reed, Rebecca Allen, David Allen and Emily Allen). At the moment I have five grand-children and one is on the way. Naturally I want all coming grand-children to be included. At the moment I have no great-grand children but I want them to be included in the same manner, when the time arrives.

My younger children may feel that this form of will, will leave them at a disadvantage because they may not have had a chance to have children. But they must also bear in mind that, over a period of 20 years, the real value of money will double (because of interest). Thus, if they are 20 years younger, then they effectively get twice as much. This form of will is as fair as I can make it.

6 My trustees are to have the power of a trustee for the sale of property.

7 I regard this my will as a fully public document that anyone can read. In particular, I will send a copy to anyone that is in anyway associated with it. If there is anything in the will that you don't like (or think is unclear) please see me as soon as possible. I will do my best then to change the will.

In witness where of I have set my hand this day of 2019.

My Will in General

I am a very peculiar person. I have spent most of my life trying to solve the major future problems of our world.

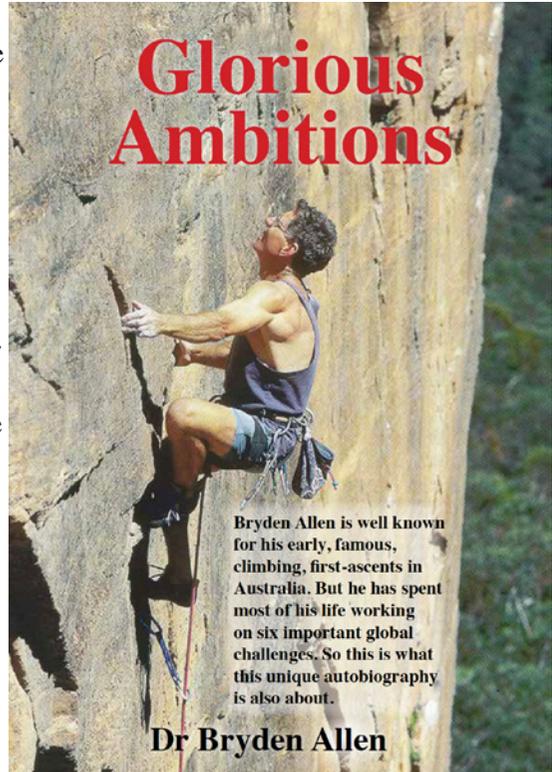

For example, over the past 50 years, the rich have proceeded to get richer and so the poor have proceeded to get poorer. Also we have polluted our atmosphere with our CO2 and so we have caused our climate to change. So I have spent most of my life trying to solve these and other related problems.

These problems and their solutions can be first easily read in my autobiography “[Glorious Ambitions](#)”. But my website has all my writings. This work consists of 8 factual books, 7 novels and about 200 webpages. So naturally, I am very keen that our future coming world will continue to be able to see the solutions, which I have given for our future world.

I would like for my website to remain on the Internet for about a hundred years so that all people can appreciate the solutions I give for all problems of the world. But, it is very hard to be sure that this website will remain operational for this very long period of time.

One way, I can help keep my website safe for the future is simply to give copies of my website on USB sticks to the many people I know quite well. Then these people can regenerate my website from their personal USB sticks. So this means this whole website should be reasonably safe for many years to come - I hope.

But a large number of people won't want my books and solutions to be seen by the general public. So rich people won't want to hear that rich

This is my autobiography book describing my life

people should be taxed much more heavily (like they were in the 1950's when I was young). And people with good jobs won't like to hear that there should be a limit on how long they can stay to that job, so that the young, poorer, people can do such jobs instead. Also, people, who have been taught to believe in Globalism, don't want to be told that we would live healthier lives, if we lived in small communities of about 100 people. So there are strong incentives for some people to try to get my website closed down, when I am dead.

But this situation could apply to the members of my own family as well. In my autobiography, I describe why and how my 2 wives and my close partner, who I had a child with, separated. Most people feel that these detailed facts should not be made public. But, if I did this, then I felt I wouldn't be telling the full truth of my life. I like and support everything my wives and my close partner did when we separated. I continue to think that they are all very good, kind people. But I, for myself, also wanted to put forward my case, that I was just doing, what any other normal sensible person would do in these rather difficult circumstances. But this not what some of my family now feel.

So there are probably a large number of people, who would like my website to be quietly just forgotten about and then closed down. But I would like my whole website to remain intact, so that people can read about: my great early climbing exploits; my solutions to the various problems of this world of ours; and the full details of my life.

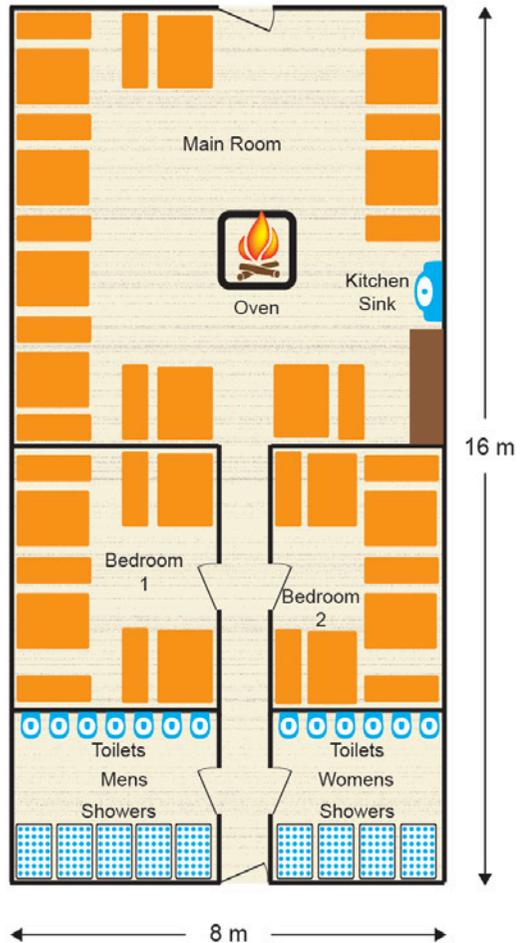

This photo shows most of my family.

But I have another peculiarity – this that I quite enjoy living frugally. This also means that I have ended with quite a lot of money, which my children and grand-children can now enjoy when I am dead.

But please don't think I did this for my children's benefit. I simply find it easier to live without too many possessions. So I find it more comfortable and friendlier to live in just one room of a building than in a whole house. And then I find it easier to just use public transport rather than owning a car. And then this gives me plenty to write all my books and novels.

In my novel "[The Wonder Plant](#)", I describe a way of living where 40 people can live communally in just one house and live very happy lives indeed. This is the way I would like to live myself. But, if people want to have the problems associated with owning houses and cars, then I am happy with that way of living as well for the people who want it.

Manor Diagram

This is how I personally would like to live.
